PROFESSIONAL SUMMARY

CEH-certified B.E. student in C.S.E., IoT & Cyber Security including Blockchain Technology, specializing in Offensive Security, Cloud Security, AI Security, and Threat Analysis. Hands-on experience with VAPT, ethical hacking, secure cloud infrastructure, and DevSecOps using Terraform and Docker. Proficient with Kali Linux, Burp Suite, Nmap, Wireshark, and Zeek. Passionate about building secure, scalable, and resilient enterprise systems.

TECHNICAL SKILLS

Security: Penetration Testing, VAPT, Ethical Hacking, Threat Analysis, Network Security, OWASP Top 10, LLM Security, Prompt Injection, RAG Security, MCP Security, SIEM Fundamentals, Log Analysis

Cloud: AWS, Oracle Cloud Infrastructure (OCI), Microsoft Azure (Foundational Exposure)

Containers & Orchestration: Docker, Kubernetes

DevOps / IaC: Terraform, GitHub Actions, Jenkins

Programming: Python, Java, C, JavaScript, TypeScript, SQL, React.js, Node.js, Flask, FastAPI, MongoDB, Web3.py, HTML, CSS

Security & Developer Tools: Kali Linux, Wireshark, Burp Suite, Metasploit, Nmap, Zeek, Splunk (Foundational), Git, GitHub, VS Code, VirtualBox, Vagrant, REST APIs

Operating Systems: Linux, Windows

EDUCATION

Guru Nanak Dev Engineering College, Bidar (VTU) — Bachelor of Engineering (B.E.) in C.S.E., IoT and Cyber Security including Blockchain Technology
2023 - 2027

Current CGPA: 8.08/10 (First Class with Distinction) | Upward trajectory (8.89 SGPA in 6th Sem)

Guru Nanak Public School — Class X | 83%

2020

EXPERIENCE & INTERNSHIPS

Future Interns | Cybersecurity Intern (Trainee) ([Repository](#)) 06/2025 - 07/2025

- Performed analysis and testing on web applications and network systems, identifying issues and supporting resolution.
- Assisted in monitoring system activities, analyzing application logs, and documenting findings to improve reliability.

Thiranex | Cyber Security Intern ([Repository](#)) 05/2026 - 06/2026

- Conducted vulnerability assessments and completed practical cybersecurity projects under industry mentorship.

CodeAlpha | Cyber Security Intern ([Repository](#)) 05/2026

- Engineered and deployed a network monitoring solution to analyze traffic patterns and detect anomalies.
- Executed comprehensive static code analysis to identify vulnerabilities and enforce secure software practices.

PROJECTS

AI-Powered Multi-Cloud Portability and Deployment Automation Platform ([Repository](#)) Mar 2026 - Present

- Designed a scalable multi-cloud infrastructure using Terraform, reducing manual provisioning effort by ~35-40%.
- Containerized application environments using Docker to ensure consistent cross-environment deployment.

Automated Cloud Infrastructure Setup (Terraform - DevOps Project) ([Repository](#))

- Designed and deployed automated cloud infrastructure using Infrastructure-as-Code (Terraform), reducing manual provisioning effort by ~40%.
- Created and managed cloud resources efficiently across environments using OCI services.
- Implemented automated deployment workflows, improving system reliability and reducing configuration errors by ~30%.

DPDP Act 2023 Compliance & Data Privacy Protection System — ([Repository](#)) 2026 - Present

- Engineered a Docker-containerized DPDP Act 2023-compliant platform (React, TypeScript, Flask, MongoDB) with role-based Patient, Doctor, and Admin dashboards secured via JWT authentication and AES-256 encryption.
- Implemented blockchain-backed consent verification and immutable audit trails on Ethereum (Ganache) via Web3.py, using Chameleon Hash redaction to support Right to Correction, Right to Erasure, and compliance monitoring.

Adversarial AI Attack and Defence Simulator ([Repository](#))

- Built a PyTorch-based adversarial AI simulator implementing FGSM and PGD attacks with configurable strength to evaluate ML model robustness in a Red Team vs. Blue Team framework.
- Designed defenses (adversarial training, denoising, randomized smoothing) and benchmarked attack success vs. defense effectiveness.

PUBLICATIONS

- ARP Poisoning Prevention Using ICMP-Based Validation and Centralized Voting, HBRP Research Publication (Vol 01, Issue 02, 2025). ([View Publication](#))

CERTIFICATIONS

- [Certified Ethical Hacker \(CEH v13\)](#) — EC-Council | Ethical Hacking & Penetration Testing
- [Certified Online Fraud Prevention Specialist \(COFPS\)](#) — Hack & Fix Academy | Fraud Detection & Prevention
- [Oracle Cloud Infrastructure 2025 Certified Foundations Associate](#) — Oracle University | Cloud Infrastructure Fundamentals
- [Certified Large Language Model Security Expert \(CLLMSE\)](#) — Red Team Leaders | LLM Security, Prompt Injection & AI Security
- [Microsoft AI Skills Fest 2026](#) — Microsoft | AI & Security Fundamentals
- [AWS Foundations: Getting Started with AWS Cloud Essentials](#) — Amazon Web Services (AWS) | Cloud Computing Fundamentals
- [Getting Started with Cybersecurity](#) — IBM SkillsBuild | Cybersecurity Fundamentals

HACKATHONS & ACHIEVEMENTS

- Successfully participated in "ADVAYA 2.0," a 24-Hour National Level Hackathon by BGS College of Engineering and Technology (Apr 2026).
- [Cyber Kushti Hackathon](#) | [National Financial Literacy Quiz 2026](#) (NISM & SEBI).
- Secretary, Cyber Samurai Association (GNDEC Bidar): Planned and coordinated "Hacktober," a cybersecurity awareness event for 150+ students.
- [GitHub Achievements](#): Earned Pull Shark and Pair Extraordinaire badges for pull request merges and co-authored commits.
